

# Kayak 4 Earth

*Talking Sustainability in the Face of Global Warming*

Experience a Unique Story

## Brisbane to Adelaide via the Inland River System in a Kayak with Three Wheels

In May 2007 Steve Posselt, a 54 year old civil engineer set off from Brisbane with his unique kayak. After four months, 1,080km of walking and pulling the kayak, plus 2,170km of paddling he reached his destination.

All Steve's working life he has been in the water industry so he does understand water. What he learned on the trip will interest you, at times move you and at times amuse you.

Steve's goals were to:

- Raise awareness of what we need to do in the face of global warming, which is a result of unsustainable practices
  - Learn about the land and water from the people and by observation
  - To simply have an adventure – one that was challenging but not dangerous
- He achieved each of these and more.

Contact:

Steve Posselt - Ph: 0438138982 or email : [steve@kayak4earth.com](mailto:steve@kayak4earth.com)

More information: [www.kayak4earth.com](http://www.kayak4earth.com)

Less than a year before he set out he had every rib broken on one side, a punctured lung with a blood filled chest cavity, what was described later as a horrific shoulder injury, concussion giving rise to inner ear balance problems and other less significant issues all as he lay unconscious in the bulldust in central Australia having come off his motorbike.

If you want to hear Steve speak, see his unique slides, see how he talked to the school children on the way, learn just a little about the great Australian country on the way, and be challenged on climate change issues then use the contacts below.

Speaking fees are significantly less than other professional speakers of equal prominence. Presentations for the water industry and schools do not incur charges but will incur expenses in many cases.
